BIOHAZARD MOUSE V2

USER MANUAL

1 System requirements

- Microsoft Windows
- USB port
- Optical drive
- 50 MB free disk space

2 Installation

Connect the BIOHAZARD MOUSE V2 to your computer and install the software on the enclosed CD. Proceed as follows:

1. Open the driver file and click setup.exe.
2. Click "Next".
3. Select the folder where you wish to install the software and click "Next".
4. Click "Finish" to complete the installation.

3 Software

After installation, the Windows notification area will display the software icon. Click it to launch the configuration software.

Main control

Mouse preferences can be set on the introductory screen of the software included with the BIOHAZARD MOUSE V2. Here you can assign various functions to the buttons (see the Button Function table), reset settings and select profiles.

Profile settings

Settings for various applications and games may be saved as individual profiles. Up to five configurations may be saved.

Button function

BIOHAZARD MOUSE V2 has a total of 7 buttons which may be assigned various functions. The following may be assigned by clicking on one of the seven available rows:

Left Click	
Right Click	
Scroll Click	Middle click, enables content to be moved in web browser
IE Forward	Forward in web browser history
IE Backward	Backward in web browser history
DPI Switch	Adjust sensor resolution
Double Click	
Fire Key	Repeat clicking – frequency is settable in Advanced Settings
Single Key	Key assignment
Button Off	
Multimedia	Next/previous song, stop, play/pause, mute, reduce/increase volume
Assign Macro	Assign Macro and access Macro Manager

Macro manager

Macros record keystrokes made while the macro is being recorded. It serves to simplify simple, repeated tasks (e.g., generating magic in games, etc.). Access to the Macro Manager is via the Assign Macro selection in the Key Setup menu.

Recording

1. Click "New", enter macro name and confirm by "ENTER".
2. If you wish individual keystrokes to contain time delays, check "Record Delays Between Key Commands".
3. Press the "Start Recording" button.

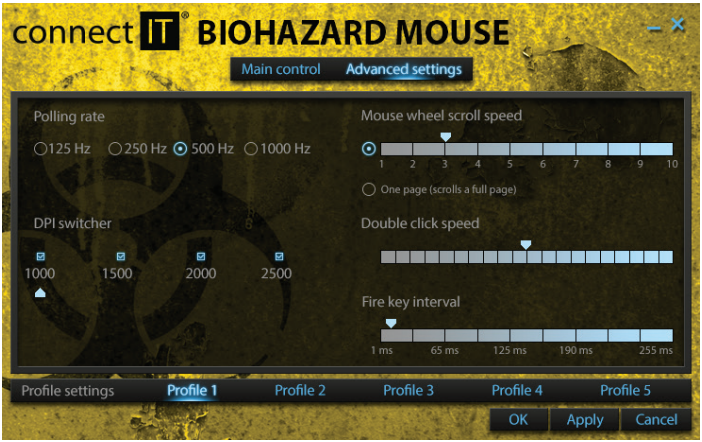
4. Press the keys you wish the macro to record.
5. Once recording is complete, press "Stop Recording" and click OK to save.
6. Assign the macro to the desired key in the Assign Macro list.

Advanced settings

Advanced Settings are available from the upper menu. Settings here include Polling Rate, DPI Switcher, Mouse Wheel Scroll Speed, Double Click Speed and Fire Key interval.

Polling rate

Sets the polling frequency for the mouse. Higher values equal more frequent polling.



Saving settings

To save click "Apply".
